At Gallaudet University

SAFE SPACE

2021

Your well being is Flik's #1 priority. Here's what we're doing to protect your health and peace-of-mind so you can focus on getting down to business.

We are committed to implementing conscious and intentional processes to not only combat this virus, but promote healthy best practices that you can adopt at your own events and will become a consistent priority for all of our events during high- and low-risk time periods alike. Flik firmly believes that we have to be the leaders in showcasing safe conferences while still allowing all attendees to have fun and book business.

TEMPERATURE CHECKS

We will conduct temperature checks on staff before they enter the event.

MASKS

Masks will be required for attendees and staff. Masks will be provided for any attendee or staff who needs one.

SANITATION STATIONS

We will provide hand sanitizer stations throughout the event.

DISINFECTANT MISTERS

We will place disinfectant misters in high-traffic areas, meeting rooms, guest rooms, elevators, and public restrooms.

DISTANCING MEASURES

We will observe distancing measures and place plexiglass shields at registration desks.

OUTDOOR SPACES

We encourage outdoor space usage to allow for better social distancing and taking advantage of sun's natural disinfecting ability.

MANAGING TRAFFIC

We will use larger aisle ways and one-way only aisles to help manage traffic. Designated controlled guest entry and exit from the hotel.

SEATING SPACING

We will set up education session seatings 6' apart on all directions.

FOOD & BEVERAGES

We will provide food and beverages in a no-contact way and pre-package food when possible.

CLEANING

Increased Cleaning frequency of all public areas.

STAFF MEASURES

Contactless Clock for punching in/out of work

GUEST SERVICES

Touchless check-in at Front Desk for guest rooms

SUSTAINABILITY

FLIK has always been at the forefront of sustainability. These precautions make our venues less environmentally sound. However, during this time your safety takes precedence.

TRAVEL SAFETY

Research has shown that there is very little risk of any communicable disease being transmitted on board an aircraft. Most modern aircrafts have recirculation systems that pass the cabin air through HEPA filters trapping viruses.
